Development projects and international commercial representations

GLOBAL NETWORKING

Through global networking we generate an enterprises network and a solid data base of contacts, current and exclusive information to get into diverse sectors, thus consolidating local and national strategic partners, with the aim of working together in important development projects.

In this globalization logic, we intend to open, manage, promote and assess new comercial oportunities at the Latin American market and at the global level.

Transport and sustainable urban mobility systems

- Urban mobility master plans
- Integrated transport systems
- Turistic and urban cable cars
- Logistic and freight transport
- Market research and transport demand
- Transport system modeling
- Road impact and modal integration
- Non-motorised urban transport systems

Preliminar studies and project design

- Project definition and identification
- Possible solutions
- Financial analysis
- Legal analysis
- Environment pre evaluation

Feasibility studies

01 MARKET RESEARCH

- Situation diagnosis
- Supply and demand determination
- Demand projection
- Demand elasticity and sensibility
